"I wanted to share with you a recent success we had with the iWave line of products. North Texas Central College had a dorm room that was uninhabitable due to a nauseating smell. The college came to us in need of a product that would eliminate the smell. We introduced them to a number of smell preventive and eliminating products and they decided to go with the iWave-R. Shortly after the installation, the head of maintenance noticed the smell was entirely gone. Now the college is requiring these on all their HVAC equipment. Thank you for making a product that helped my customer."

Tyler Grier - Cooke County Winair

"Dear Chris, as you know we had an extremely difficult resident's room with a strong smell of urine. We really thought it was a lost cause and planned on re-carpeting and padding the room....We still can't believe it. Within 24 hours the odor was dramatically reduced and within 48 hours the odor was completely gone."

Christopher Jackson, Executive Director

"I have heard good reports about your Bi-polar Ion unit from people that have installed them, but was skeptical about the claims that it removed odors... We installed the unit on Friday and by Monday morning there was no trace of the odor.... I'm a firm believer of your product after putting it through the hardest test I could find... I highly recommend your product to anyone who asks about an increase their air quality."

Mark Gill, President, Tri-M Mechanical Services

"I just wanted to inform you that we are extremely happy with our iWave's performance. The unit has been up and running now for over a month and I have noticed a marked difference in the air quality of our office. Before its installation, we were experiencing a funky moldy smell which is now long gone. We will be purchasing an additional 4 units for our other ACs. Thanks!"

Best regards, David B Cordes

- Middletown Russell Library – Middletown, CT

"To give you a little bit of background; the recovery area of my animal hospital was an enclosed area with no return air; the room was originally too warm-stagnate air to be exact with an overpowering urine smell!...Immediately I noticed a difference in the smell and within 24 hours the smell was completely gone! This has been a problem for me for 25 years so I was very grateful when the product solved this issue. Also, you are not able to smell the animal smell in the air once they are in the facility. Additionally, in the operating rooms bacteria can get on the stainless steel tables and operating instruments-we have not had any bacteria issues in the operating rooms."

Dr. Jeff Young, Planned Pethood Plus, Inc.

AVAILABLE MODELS

iWave-R
Self-cleaning, maintenance-free air purifier for residential systems
